

## PROM NIGHT

Senior prom is one of the most anticipated events of the school year. Who's taking who...who will have on the best dress...who will win Prom King and Queen...who will arrive in a limo...and the list goes on. Though this is an exciting time for high school students,

students should be aware of the dangers surrounding prom night. Every girl has planned for this night for years. Don't let your plans be ruined by bad decisions.

## KNOW THE FACTS

- Females process alcohol differently than males; smaller amounts of alcohol are more intoxicating for females.
- Statistics show that students who choose to drink and drive on prom night are seven (7) times more likely to have sex and much less likely to use any protection or condoms, thereby increasing their chances of pregnancy and STD's.
- Among male high school students, 39% say it is acceptable for a boy to force sex with a girl who is drunk or high.

**Don't Let Your Prom *Dream* Turn Into A Prom *Nightmare*!!!**

- Be Smart
- Be Safe
- Think About the Choices You Make!

The choices you make in one moment can affect the rest of your life. Think about your future and stay true to your plans.
